

Oreo cookies: check the country and variety

What the manufacturer says for Europe

The UK manufacturer FAQ states that biscuits produced in Europe are not halal certified. It separately describes their suitability for a Muslim diet, with named exceptions. That manufacturer position is not a halal certificate and does not cover products from other countries.

Check the product you have

Read the ingredient list and certification on your exact pack. Match the country, variety and production evidence. Do not assume that a UK or European statement covers a U.S. pack, or that kosher certification establishes halal certification.

If something is unclear

Ask the manufacturer or certifier about that product and lot.

Sources checked October 17, 2026. Ingredient evidence alone does not establish halal certification.

RECIPE: OREO 'DIRT' PIE ('DIRT' CAKE)

Try 'Dirt,' a dessert from the American South made with crushed Oreo cookies, cream cheese, pudding and whipped cream. Decorate the 'dirt' with flowers, toy trucks or other outdoor themes.
